DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 23, 2004 has been entered.

Allowable Subject Matter

2. Claims 33-50 are allowed.
3. The following is an examiner's statement of reasons for allowance: This invention deals with a method for controlling strippability of a coating layer on an electric conductor, said coating layer having the property of strippability so that it can be stripped from the electric conductor, the electrical insulation properties of said coating layer being kept constant after exposure to moisture. said method comprising adding to a polymeric composition forming said coating layer. a predetermined amount of a polyolefinic compound which contains at least one unsaturation and at least one carboxyl group in the polymer chain (claim 33).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2831

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

4. The case being allowed the applicant is required to submit new formal drawings.

Response to Arguments

5. Applicant's arguments filed March 26, 2004 have been considered and they are persuasive. Specifically, the applicant's argument that the reference does not expressly or inherently teach (1) a polyolefinic compound which contains at least one unsaturation and at least one carboxyl group in the polymer chain or (2) a method for controlling the strippability of a coating layer by the addition of the polyolefinic compound and therefore cannot anticipate the claimed invention as claimed.
